

Press Release

Glens Falls, NY – February 3, 2005 Danfoss Flomatic Corporation introduces the latest addition to the growing “Heavyweight Champ” family of 80DIX check valves. The new heavy duty 12” Model 80DIX check valve (NPT female connection) is designed for larger submersible pumps for well water, irrigation public and pumps booster systems. This valve features a double guided poppet, with a ductile iron body and has anti-poppet spin lugs with stainless steel fasteners. It is designed for vertical or horizontal applications and can be installed with an optional break off plug for draining the riser pipe. Danfoss Flomatic offers a complete range of several other types of check valves from ½” thru 30” in various body materials.

For more information please call Danfoss Flomatic Corporation at 1-800-833-2040 or 518-761-9797 ext. 225. You can also obtain detailed information on this product and all of their products at www.flomatic.com or please feel free to email them at flomatic@flomatic.com
